2021 ANNUAL REPORT

Dear Valley-Wide Friends and
Community Partners,

A year ago, I wrote about the impact COVID-19 had on all of us, and at that time, I would have never believed that the pandemic would continue to affect all of our lives throughout 2021. However, 2021 did bring some improvements and opportunities. Like being able to see family members and friends in person instead of over Zoom once again. Valley-Wide was able to start bringing most of our patients back into the office, although telehealth is still an option and is here to stay. As we opened up our doors to our patients, community members, and families, we did so with a new outlook on our future and a new passion for caring. As I write this message and reflect on the year 2021, what I am most excited about is the Valley-Wide staff and teams. I am so inspired by the commitment and passion that our staff demonstrates every day and in every interaction.

In 2021, we continued our progress on our strategic planning pillars of Culture Evolution, Employer of Choice, Model of Care, Patient Experience, Quality, and Sustainability. Our strategic planning teams made great progress by identifying opportunities and implementing positive changes in our organization. We plan to continue this work throughout the upcoming year with a renewed enthusiasm for positive change. As Valley-Wide navigates our upcoming opportunities for 2022, I am confident that the time we spent during 2021 focusing on our culture has created a foundation for Valley-Wide that will help us be successful in any endeavor we choose. I am proud to be part of the Valley-Wide team, and I look forward to what the future brings for us.

Sincerely,

Jania Arnoldi

About Us

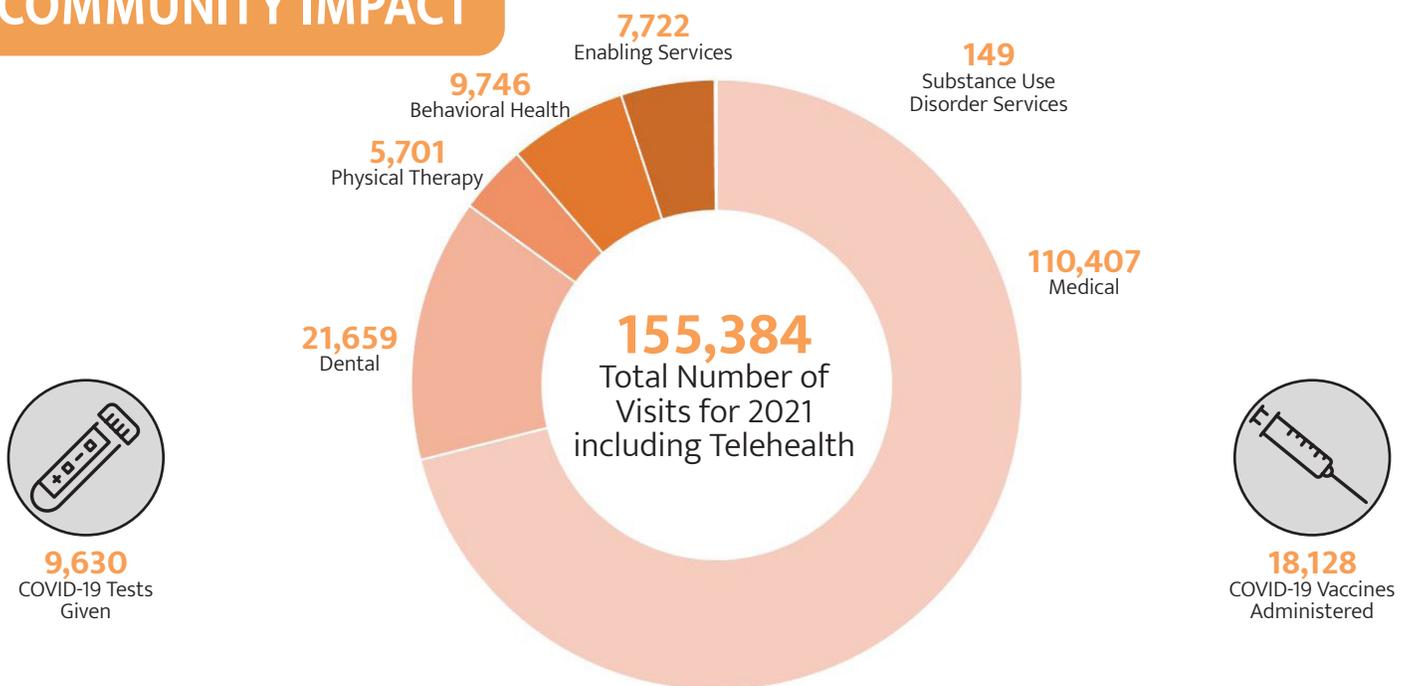

Valley-Wide is a private non-profit 501(c)(3) corporation governed by a volunteer community board. Established in 1976, Valley-Wide has fifteen primary health care delivery sites strategically located throughout rural counties in Southern Colorado. These full-service clinics, including integrated behavioral health services, are complemented by nine dental clinics, four physical therapy clinics, a school-based health clinic, an outpatient behavioral health clinic, and numerous ancillary health services to serve the needs of patients in our communities.

Valley-Wide serves patients of all ages through a family practice focus approach. Emphasis is placed on assisting the patient by reducing barriers such as cost, culture, language, literacy, and transportation that may hinder access to appropriate health care services.

Our Mission

Valley-Wide Health Systems is committed to providing high-quality, safe, effective and integrated health care services in a respectful and inclusive manner for all with special consideration for medically underserved populations.
